- Pathum Thani, Thailand

EDUCATION

Master of Engineering

Asian Institute of Technology
Pathum Thani, Thailand
2024-2026
Data Science and Artificial Intelligence

Bachelor of Engineering

Myanmar Aerospace Engineering University
Meiktila, Myanmar
2010-2015
Avionics

Certificates

- IBM Data Science
- IBM Data Analyst
- Mathematics for Machine Learning and Data Science by DeepLearning.AI
- Machine Learning Specialization by DeepLearning.AI
- TensorFlow Developer by DeepLearning.AI
- Deep Learning Specialization by DeepLearning.AI
- Fundamentals of Accounting by University of Illinois

PROFESSIONAL SUMMARY

Data-driven professional with strong experience bridging AI, data engineering, and business analytics. Skilled in designing LLM-powered systems, implementing RAG frameworks, and deriving insights from complex data to support decision-making. Combines a foundation in SQL, Python, and ML/DL frameworks with expertise in business process automation and data-centric application design.

WORK EXPERIENCE

AI Intern (LLM Developer)

AI Brain Lab July 2025 - Present

- Developed ESG report-generation pipeline using LLMs and retrieval-augmented generation (RAG).
- Built conversational chatbot using FastAPI and OpenAI API for SET (Stock Exchange of Thailand) queries.
- Scraped and embedded thousands of SET documents using the RAPTOR framework for semantic retrieval.
- Implemented table extraction and structured data parsing from CSV, PDF, and Excel files to support analysis.
- Deployed Docker-based microservices for scalable AI workflows and data answering automation.

Tools: LangChain, LangGraph, RAPTOR, FastAPI, Docker, OpenAI API, Python

Senior Business Analyst

KEYfields February 2023 - July 2024

- Engineered complex SQL stored procedures optimizing data flows for SaaS accounting and logistics systems.
- Automated deployment and database backup routines via PowerShell and Python, reducing processing errors and runtime by 50%.
- Collaborated with developers to translate business logic into data models and visual dashboards.
- Led cross-functional workshops to align data requirements with scalable SaaS design principles.
- Delivered technical support and issue resolution for production AI/analytics modules.

KAUNG NYO LWIN

DATA SCIENCE & AI PROFESSIONAL

SKILL

- **Programming & Frameworks**
 - Python
 - SQL
 - PowerShell
 - LaTeX
 - VBA
 - FastAPI
 - PyTorch
 - LlamalIndex
 - LangChain
 - HuggingFace Transformers
 - Vector Databases (FAISS, PG)
- **AI & ML**
 - Machine Learning
 - Deep Learning
 - RAG Systems
 - Agent and Tool
 - MCP
 - Reasoning in LLM
 - Reinforcement fine-tuning (DPO, PPO, GRPO)
 - OpenAI LLM APIs
 - NLP & Computer Vision
- **Data Analytics & Databases**
 - NumPy & Pandas
 - Matplotlib & Seaborn
 - Power BI
 - Excel Automation
 - PostgreSQL, MySQL, MSSQL, MongoDB
 - Data Cleaning & Transformation
- **MLOps & Deployment**
 - Containerization (Docker)
 - MLFlow
 - API Development
 - Version Control (Git)
- **Business & Domain**
 - ESG Reporting
 - Telecommunications Logistics
 - Asset Management
 - SaaS Systems
- **Soft Skills**
 - Cross-functional collaboration
 - Stakeholder communication
- **Languages**
 - Myanmar (Native)
 - English (C1)

WORK EXPERIENCE

Senior Asset Management Analyst

Telecom International Myanmar

May 2020 - September 2020

- Directed end-to-end logistics and inventory oversight for >100 asset types across telecom operations.
- Built Excel/VBA-based automation for asset tracking, reducing manual reporting workload by 40%.
- Analyzed asset utilization and optimized procurement cycles using data-driven KPI dashboards.
- Trained teams on data integrity and reporting best practices to improve KPI adherence.

Asset Management Analyst

Telecom International Myanmar

June 2017 - April 2020

- Designed Excel-based logistics trackers and automated macro systems for telecom tower deployment.
- Coordinated rollouts for 700+ sites achieving 98% KPI compliance through process standardization.
- Improved communication between technical and business teams via data visualization dashboards.

Telecom Installation Engineer

Ericsson Myanmar

February 2016 - May 2016

- Performed telecom site surveys, equipment installation, configuration, and call tests ensuring network readiness.
- Supported cross-team testing and documentation for quality assurance deliverables.

Projects

Asian Institute of Technology

August 2024- May 2025

- **Software Documentation Bot** | Python, LlamalIndex, Flask
 - Automated software documentation using LLMs to bridge communication between developers and business users for a reduction in manual workload and time.
- **Job Automation Risk Prediction** | Python, Scikit-Learn, Django
 - Developed a machine learning model to predict automation risk per occupation with an interactive dashboard for career recommendations.
- **Customer Churn Prediction System** | Dash, Scikit-Learn, Pandas
 - Built a classification model to predict customer churn in telecom data with an evaluation of business-oriented metric (risk factor).
- **Implementation of Less-attention Vision Transformer** | PyTorch, Deep Learning
 - Implemented a recent vision transformer architecture for image classification research with optimized attention mechanisms.
